

# **Supplier University**

- Change Management

Mar 2015

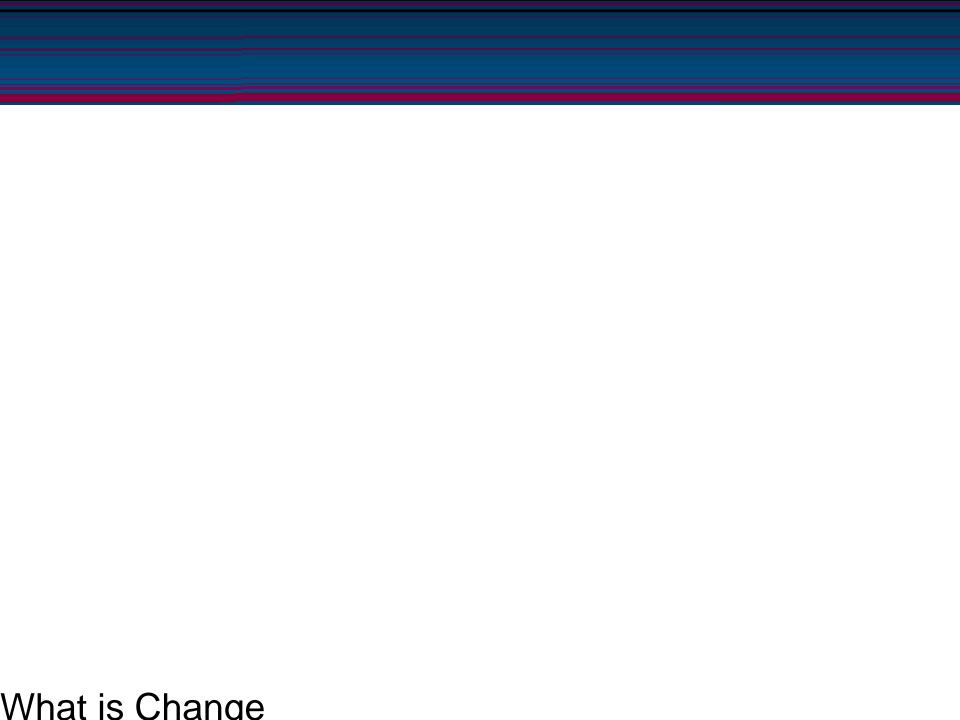

#### **Purpose**

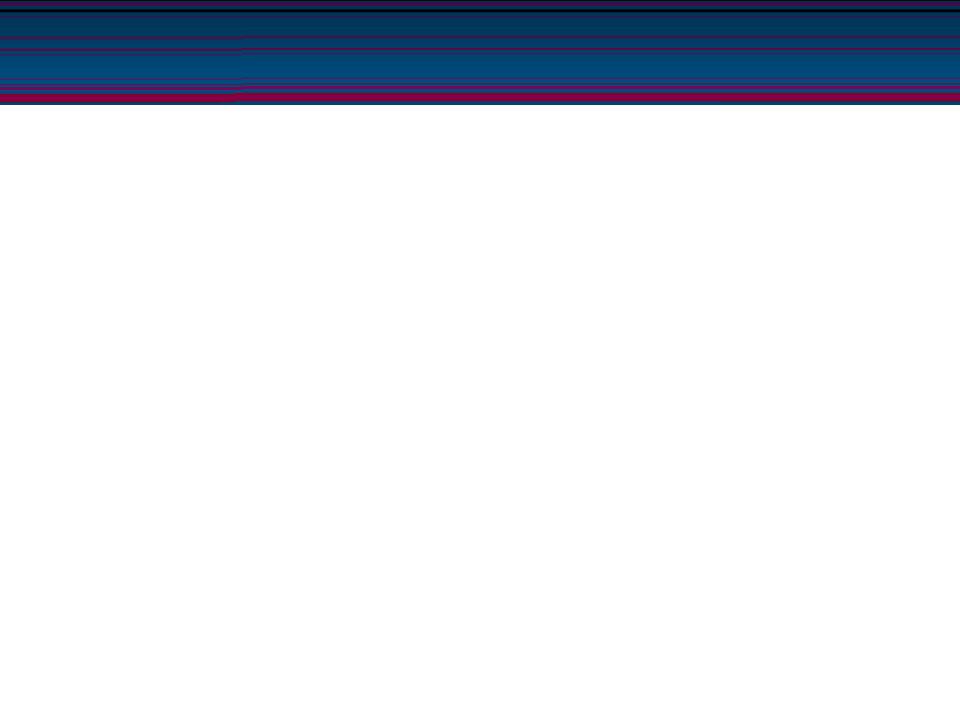

To introduce the importance of change control

To introduce the basic knowledge of change control

To introduce Jabil requirements on change control

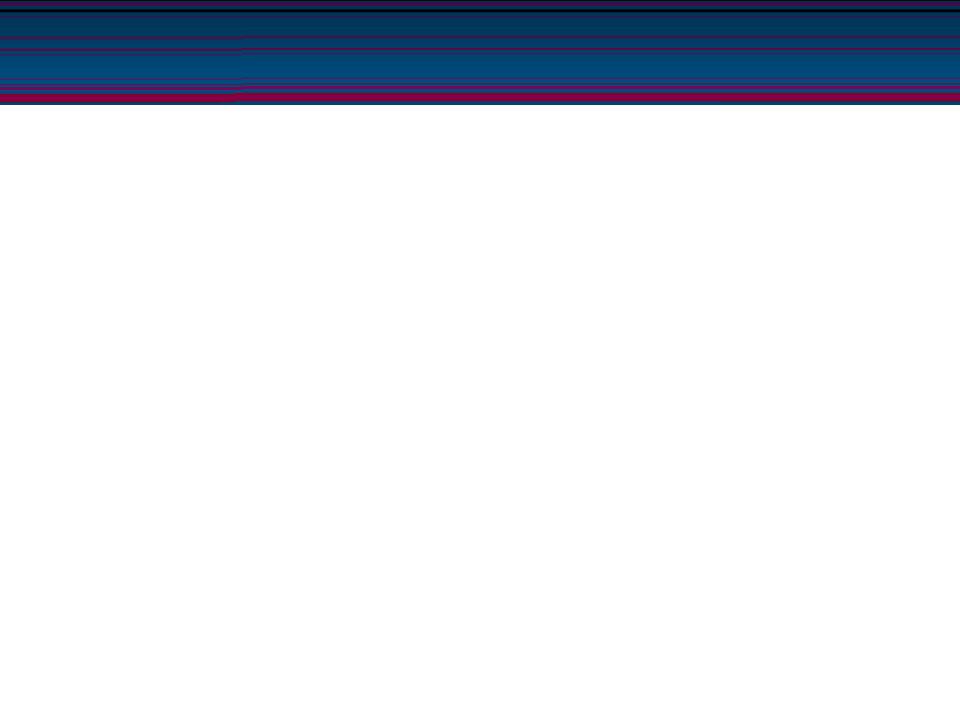

A typical change control process

#### Risk Analysis

Whenever a Change is Requested, a corresponding Impact Analysis to Product, Process, and Safety must be considered from a Risk perspective.

Introduction of additional Risk due to Requested Changes must be fully understood and potentially mitigated prior to implementation.

Risk Analysis techniques must be applied prior to implementation of changes

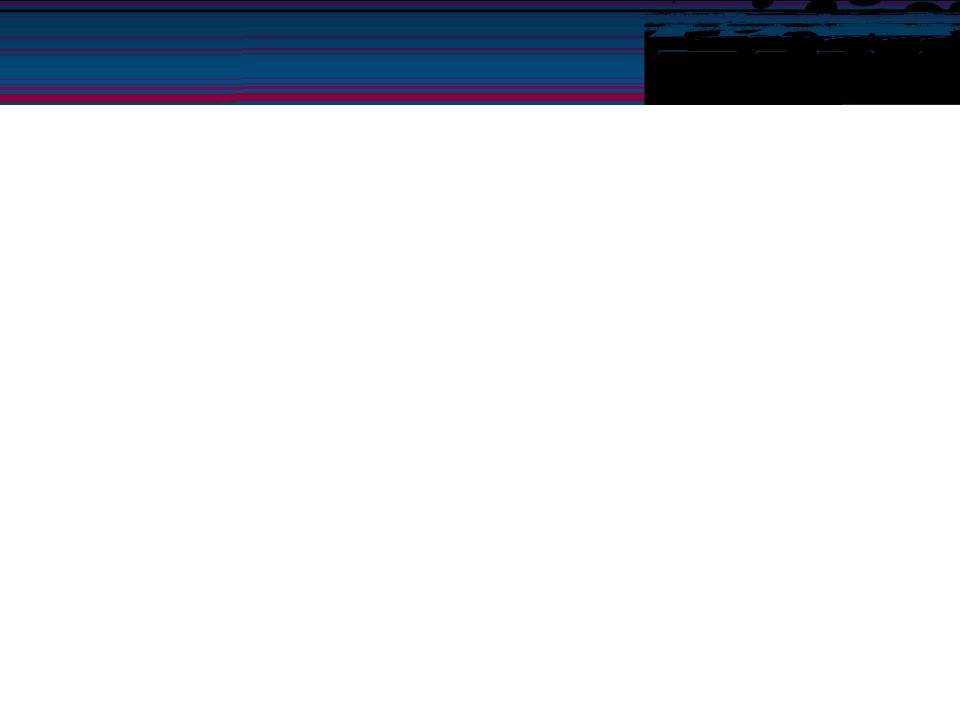

Risk Analysis

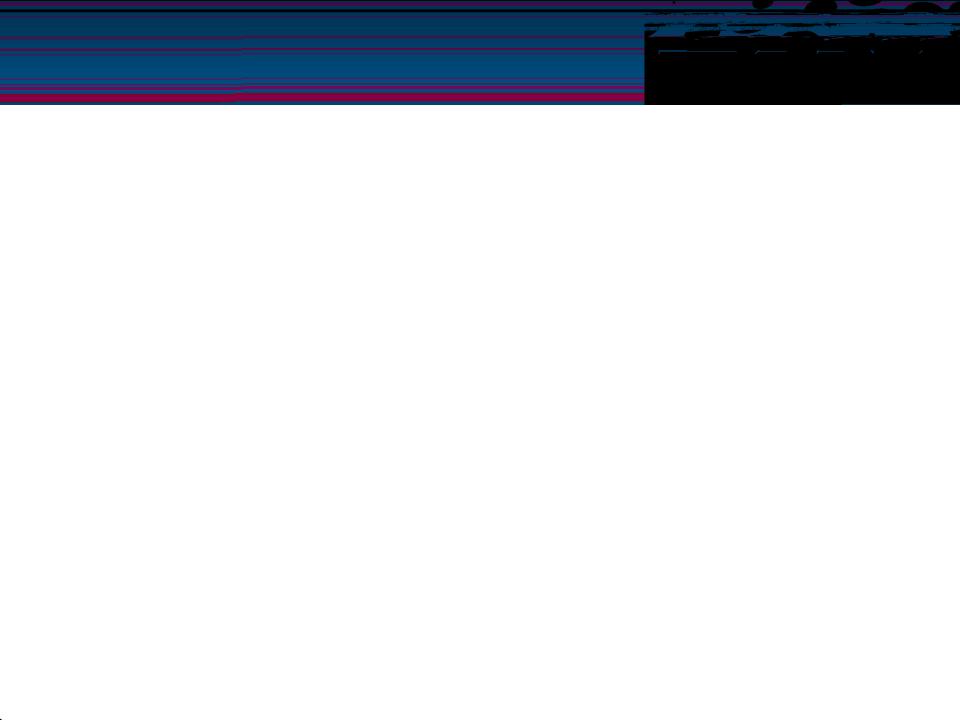

If a Risk Analysis has been previously performed,

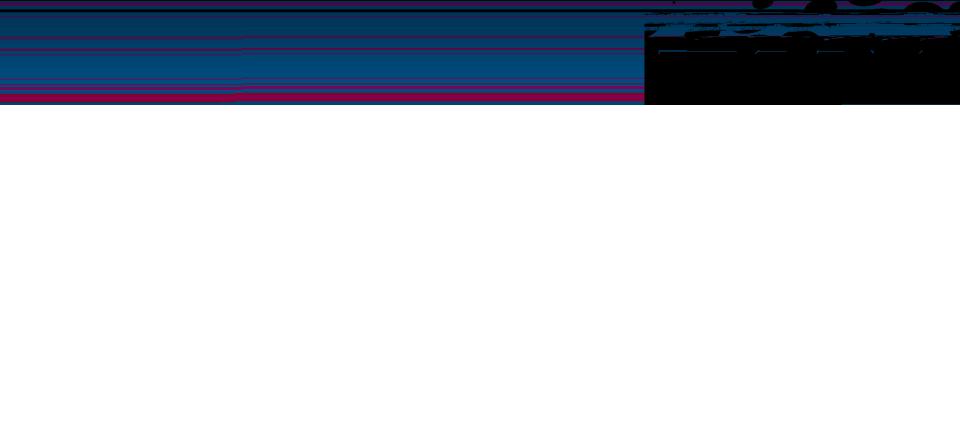

**DFx Impact** 

Records of Change Review shall be maintained.

## Jabil requirement

#### **Thank You**

Looking forward to a good business cooperation with you
